Professional Experience

01/2024 – Present
Sharjah, UAE

Innov8 Product FZC
Full Stack Developer

- Architect, build, and maintain robust backend systems using **Laravel** and **CodeIgniter**, paired with dynamic, component-driven frontends built in **React.js**.
- Develop modern single-page applications (SPAs) using **React.js** and build custom **WordPress** themes and plugins, driving site speed optimization and performance improvements.
- Deliver end-to-end full-stack web applications, covering requirement analysis, database schema design, **React component state management**, and seamless REST API integration.
- Design, document, and manage secure RESTful APIs to facilitate seamless communication between backend systems, **React frontend applications**, and third-party services.
- Deploy applications to cloud environments (AWS/cPanel) and manage version control, staging pipelines, and production releases using Git.
- Optimize full-stack web applications for security, rendering speed, database efficiency, and scalability.
- Collaborate closely with UI/UX teams to translate designs into responsive, high-performance **React components** and web interfaces.

10/2022 – 12/2023
Dubai, UAE

Shopkees
Senior PHP Developer

- Developed and supported high-traffic, PHP-based e-commerce applications and backend modules using Core PHP, Laravel, and CodeIgniter.
- Built and tested REST APIs for internal modules and external client integrations.
- Integrated secure payment gateways and shipping/logistics API modules into checkout workflows.
- Provided production support through debugging, bug fixing, performance enhancement, and feature additions.
- Utilized Git for version control and coordinated with design teams for accurate UI implementation.

06/2021 – 08/2022
Kochi, India

SBSOL Digital Pvt. Ltd
Junior Web Developer

- Engineered dynamic web applications and custom admin panels using Core PHP and MySQL.
- Designed, optimized, and normalized MySQL databases to ensure efficient data handling and query response times.
- Implemented interactive frontend functionality using jQuery and AJAX.
